

Catherine--

There's no other way to describe it: In our fight for parents' rights, medical freedom, and Constitutional liberties, ***this is one of our biggest legal victories EVER!***

A federal court for the District of Columbia granted a preliminary injunction to an ICAN-funded case, which challenged the shameful DC law which allowed doctors to vaccinate children (age 11 and older) without the consent of their parents. As the court noted, the law also encouraged children to be deceptive to their parents while obtaining a vaccination.

Thanks to your generous financial support, The HighWire and ICAN's brilliant legal team issued a devastating loss to Big Pharma and government bureaucrats who are determined to take away your parental rights.

Fighting these legal battles on your behalf is very expensive. It takes teams of attorneys, paralegals, and researchers to successfully take on these battles against well-funded corporate interests. Thankfully, with your help, we can win because the truth is on our side!

Please consider making a tax-deductible monthly donation of \$25, \$50, \$75, or \$100 today. Monthly financial support is the best way for ICAN to have predictable resources to fund our legal battles on your behalf.

Please become a monthly donor today, and help us keep winning!

Otherwise, if you would rather give a one-time donation of \$50, \$100, \$150, or any other amount, please do so today! Every dollar is greatly appreciated as we continue fighting for you.

With your support, ICAN is achieving what was thought to be impossible. Take a stand with us today, and help us continue the fight for parents' rights and medical freedom.

Thank you,
